BoundWorx® Resin Bound Collection

Over 50 Stunning Resin Bound Blends

Why install BoundWorx®?

Strong & Durable

When laid to the correct specifications, the structural strength of the BoundWorx® Resin Bound system means that it should last well in excess of 20 years.

UV Stable

UV Stability is vital. In order to retain the colour of the chosen Resin Bound BoundWorx® finish, the system has been formulated to ensure that it is fully UV Stable. Non or partial UV Stable alternatives will discolour within weeks of being installed, creating a yellowing and patchy effect where there are shaded areas.

Low Maintenance

Resin Bound BoundWorx® is extremely low maintenance. Rain water will keep it generally clean and a light pressure wash will remove any build up of algae or dirt contamination.

Permeable & Eco Friendly

Resin Bound BoundWorx® is a permeable, SuDS compliant system when laid over a permable substrate. This often eliminates the need to obtain planning permission and that it is an environmentally friendly alternative to conventional surfacing solutions.

Attractive & Appealing

Available in a wide range of stunning elite marble finishes, the BoundWorx® Resin Bound system is highly attractive with good anti-slip qualities. The smart, stylish and modern look can dramatically improve the look of any property.

BoundWorx® Big Stone uses natural stone aggregate, cut to larger sizes than our Standard Range which many of our customers find provides a more luxurious and unique finish.

BoundWorx® Big Stone provides all the same features found in our Standard Resin Bound Range, including permeability, strength and excellent protection against unwanted weeds. A perfect choice to make your driveway or garden patio stand out from the crowd.

BoundWorx® Tree Pits

BoundWorx® Tree Pits are an attractive, practical and environmentally friendly solution for covering and protecting the bases of trees where soil and roots are exposed.

This permeable system helps to alleviate vandalism, litter entrapment and messy loose gravel while giving a smart finish and still allowing the tree to grow.

Any **BoundWorx® Big Stone** blend can be used as a Tree Pit.

MAINTENANCE

We recommend Stontex's range of environmentally friendly cleaning products to keep your BoundWorx® Resin Bound driveway or patio looking as good as new.

Visit resinbonded.co.uk for more details and to order.

BoundWorx® Restore

BoundWorx® Restore is a clear UV stable system that can be used on new and existing Resin Bound Surfaces to revive the surface adding the clear gloss sheen that freshens and restores the surface to its former state.

BoundWorx® Restore together with fine glass grit can be used to aid grip to Resin Bound surfaces where there is insufficient traction.

BoundWorx® Restore can also be used to reduce the effects of light blooming caused by moisture during or close after application.
